

PUBLIC NOTICE – ENVIRONMENTAL PERMIT

PURPOSE OF NOTICE: To notify the public of a proposed conversion of Dominion Virginia Power's (DVP's) Bremono Power Station from a coal-fired electric power generating facility to a natural gas-fired electric power generating facility, and to announce a public briefing by DVP that will provide information on a proposed Prevention of Significant Deterioration (PSD) air quality permit.

PUBLIC INFORMATION BRIEFING: Community Center and Park in Fork Union at 5725 James Madison Highway Fork Union, VA 23055 on November 3, 2011 at 6:30 PM.

PERMIT NAME: Proposed Bremono Power Station PSD Permit to be issued by the Virginia Department of Environmental Quality, under the authority of the Virginia Air Pollution Control Board.

APPLICANT NAME AND REGISTRATION NUMBER: Virginia Electric and Power Company; 40199.

FACILITY NAME AND ADDRESS: Bremono Power Station, 1038 Bremono Road, Bremono Bluff, VA 23022-0098.

PROJECT DESCRIPTION: Virginia Electric and Power Company has applied for a PSD permit to modify the Bremono Power Station; an electric power generating facility consisting of two Babcock & Wilcox wall-fired pulverized coal boilers and associated fuel handling equipment. The facility is classified as a major source of air pollution and is located in Fluvanna County on State Route 656 in Bremono Bluff, Virginia. The PSD permit involves modifying the two existing pulverized coal boilers to convert the Bremono Power Station from a coal-fired electric power generating facility to a natural gas-fired electric power generating facility. The maximum annual emissions of air pollutants from the facility are expected to be 690.3 tons per year (TPY) of Carbon Monoxide, 1,752.9 TPY of Nitrogen Oxides, 86.0 TPY of Total Particulate, 86.0 TPY of particulate with an aerodynamic diameter of 10 microns (PM10), 86.0 TPY of particulate with an aerodynamic diameter of 2.5 microns (PM2.5), 9.6 TPY of Sulfur Dioxide, 46.4 TPY of Volatile Organic Compounds, 0.2 TPY of Sulfuric Acid Mist, 0.01 TPY of Lead, and 1,346,868 TPY of Carbon Dioxide equivalent. The expected air quality impacts from the project will be within National Ambient Air Quality Standards.
